- **GPA:** 3.75.
- **Honors:** Dean's List; High Honors, Morehead Honors College (top 10% of Honors College graduates).
- **Publication:** *American Option Pricing Around Scheduled Earnings Announcements* (quantitative finance).

EXPERIENCE

VETTA AI, Athens, GA **January 2026-Present**
Head Systems Engineer, AI and Data Systems

- Serve as principal client contact for Rumble (NASDAQ: RUM), Northern Data AG, Quake AI, the Texas Public Policy Foundation, and Hillpointe Development; negotiated engagements with executives and in-house counsel in the U.S. and Europe during Rumble's \$767M cross-border acquisition of Northern Data.
- Flagged a Georgia Open Records Act exposure in a client-run community website and proposed the data-ownership structure that in-house counsel adopted across the Privacy Notice and Terms of Use.
- Advised Rumble and Northern Data through the contested approval of a multi-billion-dollar, 180 MW AI data center in Maysville, Georgia, the company's largest U.S. development: stress-tested the conditional-use permit against Georgia zoning and open-meetings challenges, researched federal litigation over a comparable development, and directed public messaging for the town hall that preceded approval.
- Researched and drafted the operative privacy terms (data-controller and service-provider clause, vendor disclaimers, no-funding-obligation clause) for a Community Benefits Agreement survey; cleared each provision through point-by-point review with in-house counsel.
- Custom-trained a single-purpose AI model that classifies public-meeting records and returns only schema-constrained excerpts validated against verbatim source text, eliminating hallucinated citations.
- Built the platform end to end in TypeScript, Next.js, and PostgreSQL: 17 serverless functions ingesting nightly from 14 government portals, deterministic entity matching across 200+ tracked organizations and individuals, and usage-based and flat-fee billing currently earning an annually recurring revenue of \$76K.

UGA CARL VINSON INSTITUTE OF GOVERNMENT, Athens, GA **January 2026-April 2026**
Data Manager and Project Lead

- Led a 6-person capstone team on a 5-deliverable data-governance project for the UGA School of Medicine and Carl Vinson Institute, aligning technical buildout, stakeholder expectations, and privacy requirements.
- Negotiated through repeated external blockers involving 2 major data sources, translating vendor delays, authentication issues, and access disputes into concrete risk memos, escalation requests, and fallback plans.

ADDITIONAL INFORMATION

- **Languages:** Native in Russian and Belarusian; Certified Bilingual in Spanish; Ukrainian.
- **Technical:** Westlaw, Lexis, Python, SQL, R, Java, TypeScript; AI/LLM development.
- **Interests:** Cross-border white collar defense and government investigations (sanctions, export controls, FCPA); international arbitration; cooking.
